TENSION FABRIC / SEG SYSTEMS **Portable LED Light Box**

Free standing LED Light box with twist out feet for additional stability. Simple to assemble, and take down, and features integrated, plug and play, long-lasting LED lights.

With an 80mm aluminium profile this Portable LED Light box has strategically located magnetic strips built into the frame. This allows for easy connection to other Light Boxes without any gaps

Graphics can be mounted on both sides and comes supplied in a handy carry box with a compartment for each component.

Available in the following sizes...
1000 x 2000 or 1000 x 2300mm

5 Year UV

Double/Single Sided

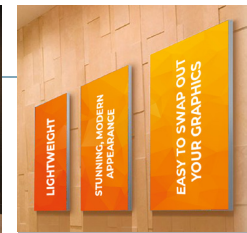

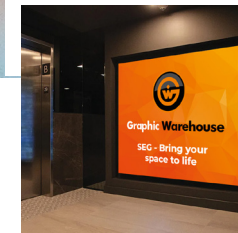

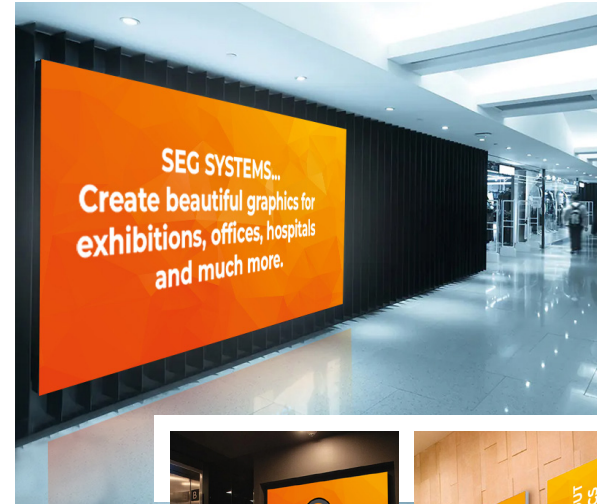

TENSION FABRIC / SEG SYSTEMS **Wall mounted**

SEG Fabric Wall Mounted Displays consist of an aluminium extrusion frame kit which is fitted to a wall. The fabric graphic is printed using dye sublimation for great image vibrancy. The graphic is finished with silicone edging and is then inserted into the aluminium and tensioned around the edge.

The result is a beautifully-finished and seamless branding solution that is perfect for any display - offices, shops or exhibitions. Graphics are easily replaceable so there's no need for skilled fitting.

Frames are super lightweight single-sided profile for internal use with a 2mm aluminium all-depth fitting. Frames come in sections and require some assembly with an allen key (included).
